PRODUCT 1

Name:

PetPace 2.0

Description:

The PetPace collar is the world's first state-of-the-art AI/ML-powered wearable health-monitoring technology designed specifically for pets. This revolutionary collar seamlessly integrates sophisticated algorithms and advanced analytics to collect real-time vitals and biometrics. By leveraging cutting-edge machine learning, PetPace delivers unparalleled insights into your pet's health, enabling early detection of potential issues and personalized care.

Overview:

World's first and only state-of-art AI/ML powered wearable health-monitoring technology designed for pets.

Seamlessly integrates sophisticated algorithms and advanced analytics to collect real-time vitals and biometrics including:

Vitals:

- Heart Rate Variability
- Respiratory rate
- Temperature
- Activity levels

Biometrics:

- Calories Burned
- Sleep Score
- Wellness Score
- Activity Score
- Pain Indicator

Leveraging cutting-edge machine learning to deliver insights into your pet's health enabling early detection of potential issues.

Transformative approach redefining how pet health is monitored and managed.

Empowers pet parents and veterinarians with actionable data to ensure the well-being of their furry companions.

Supports a proactive and preventative approach to petcare.

Other Details:

PetPace is available online to consumers at www.petpace.com and through select veterinarians and Telehealth companies.
