

Hamilton Beach®

Hamilton Beach® Defrost & Go™ Programmable Slow Cooker

Unique Defrost Function – No need to spend time defrosting meat in advance, the new Hamilton Beach® Defrost & Go™ Programmable Slow Cooker is the only slow cooker on the market that offers a defrost feature. Safely defrost and cook meat to USDA food safety guidelines without overcooking. Simply press defrost, select high or low and set your cooking time.

Perfect Results, Every Time – The patented temperature probe ensures foolproof cooking. Insert the probe into the meat, select your desired temperature and the control panel will switch to warm when the food is ready.

Flexible Programming – Elevate your cooking with this versatile slow cooker. Whether it's savory pulled pork, hearty beef stew, or flavorful vegetarian chili, this cooker brings your recipes to life. Choose high, low, or warm settings and set the timer between 30 minutes and 24 hours, or use probe mode for more control.

Great for Large Parties – Perfect for entertaining, the 6-quart stoneware crock fits a 6 lb. chicken or 4 lb. roast, making it ideal for one-pot dishes, family meals, or crowd-pleasing appetizers. The clever clip-tight lid prevents messy spills when traveling or carrying food.
