

Norton Secure VPN

Stay safer online with a VPN that won't slow you down.

How does a VPN work?

Norton Secure VPN encrypts the information you send and receive, while masking your IP address and location. It provides a more secure, private, and worry-free connection on iOS, Android, PC or Mac device on any internet connection whether you're at home or on the go.

Key features included in Norton LifeLock Benefit Plans

Location Switching and Optimized Location

Seamlessly connect to your ideal location in any one of the countries this feature is available in.

Auto Connect

Your VPN will automatically turn on whenever you connect to a public network, so your data stays safer and more private.

Ad Tracker Blocker

Help block advertisers' tracking technologies to reduce many of the targeted ads that follow you around the web.

No-log Policy

Your information is private even from us. We don't track, log, or save your browsing activities.

Split Tunneling

Help secure your data with an anonymous IP address in one tunnel while allowing data like streaming to flow across the internet directly, so the content isn't blocked.¹

Kill Switch

Automatically disconnect your device from the internet if the VPN connection is lost ensuring your IP address and online activity aren't inadvertently exposed.²

If your smartphone's Wi-Fi is always enabled, your device could be vulnerable without you even knowing.

¹ Not available on Mac and iOS.
² Not available on iOS.

Norton Secure VPN may be used on the specified number of devices – with unlimited use during the plan term. Norton Secure VPN is available for Windows™ PC, Mac®, iOS and Android™ devices:

- Microsoft Windows 11/10 (all versions except Windows 11/10 in S mode), Microsoft Windows 8/8.1 (all versions).
- Microsoft Windows 7 (32-bit and 64-bit) with Service Pack 1 (SP 1) or later.
- Mac OS 12 (Monterey) or later.
- Androids running 8.0 or later. Must have Google Play app installed.
- iPhones or iPads running the current and previous two versions of Apple® iOS.

No one can prevent all cybercrime or identity theft.
