

Proctor Silex® Smooth Edge Cordless Can Opener

Cordless and Rechargeable – This portable can opener is great for meal prepping, cookouts, tailgating, picnics, camping, and more. It seamlessly opens 60 cans in one charge and fully charges in just 2 hours. The battery indicator light shows when it needs to be charged so you never have to guess.

One-Step, Hands-Free Opening – To operate, simply place the can opener on top of the can and push the start button. It automatically aligns and attaches itself to the can before cutting around the lid. The can opener moves itself along the lid 360° while cutting, then stops and shuts off automatically when finished.

Smooth, Touchable Lid Edges – This can opener cuts along the side, eliminating sharp edges on both pop-top and regular cans. The blade stays clean because it does not touch food.

DETAILS

Proctor Silex® Smooth Edge Cordless Can Opener
