

Clippers | Self Cut Pro

Wahl designed this product after watching 1000's of self-cut home haircutters and noticing they grip clippers differently. This is a complete haircutting kit, specially designed for 'self-cut' home haircutters.

- **Dual Grip 360™** - dual soft grips for ultimate 360° flexibility, comfort, and control. The contoured body shape perfectly fits grips used most by people who cut their own hair.
- **Smart Cut™** - optimal 15° blade angle for smoother and faster cutting. This is different than the blade angle on other clippers. The angle allows for more natural arm positioning for people who are cutting their own hair. This blade angle means faster and smoother cutting results with less “pass-thru’s.”
- **150-minute run time**, Lithium-Ion Battery, provides run time for multiple haircuts on a single charge.
- **Snap-N-Lock™ Guards** with Easy-Glide Teeth allows for superior comfort and cut quality.
