For Immediate Release

 How Sweet It Is! Build Your Next Fire with Wild Cherry Firewood from Cutting Edge Firewood

ATLANTA, May 1, 2024 – Cutting Edge Firewood's Wild Cherry wood makes the sweetest fireside experience. Cherry wood imparts a delicate, subtly sweet aroma and produces fewer emissions than other hardwoods. It is also known for its bright flames that help create a memorable atmosphere.

Cutting Edge Firewood Wild Cherry farmers harvest fresh cherry trees and immediately put them through the proprietary drying process to ensure wood is pristine, dense, dry, and free of any pests, mold, or mildew. The dried logs are then shipped to Cutting Edge's Georgia warehouse where the company hand-selects each log, cuts, and packages each piece of cherry wood into elegant boxes or perfectly stacked racks.

All Wild Cherry wood is sustainably sourced from the ideal growing environment of independently owned Florida farmlands.

Boxes of 16" splits of Wild Cherry Firewood are $149 each and include enough wood for up to 4 fireside experiences, long-stemmed matches, kindling and fire starters. Shipping is complimentary in the continental United States. Wild Cherry firewood is also available in proprietary metal racks with canvas covers for $499 each and include enough wood for 25 exceptional fires.

<u>About Cutting Edge</u>
Cutting Edge Firewood was created to provide the best firewood and cooking wood available. The wide variety of firewood, cooking wood and pizza cut wood from Cutting Edge Firewood undergoes a special drying process to ensure it is free from unwanted pests, mold or fungus and provides an unmatched clean and bright burn with pleasant aroma. Cutting Edge Firewood uses only the best hardwoods for firewood and cooking, including oak, hickory, cherry, apple, pecan, and maple.
