

## RENPHO Launches Sub-\$200 Professional-Grade LED Light Therapy Mask

*The REJUVEN ARTEMIS LED Light Therapy Mask marks wellness brand Renpho's foray into beauty tech*

Irvine, California, October 1, 2025 — [RENPHO](#), a leading global wellness innovator, makes its debut in beauty technology with the launch of the [ARTEMIS LED Light Therapy Mask](#). The FDA-cleared, professional-grade LED skincare tool delivers medical-grade red, blue and near-infrared light to address a variety of skin issues and is available for less than \$200.

The ARTEMIS mask sets a new benchmark in at-home LED therapy, with **324 high-density LEDs** - more than double most masks on the market today - to deliver high performance treatments that target a spectrum of skin concerns — from acne and fine lines to hyperpigmentation, redness, and uneven tone. With 3 wavelengths in one device, red, blue, and near-infrared, users can address a variety of concerns and achieve visible results in as little as 30 minutes.

### Key Features Include:

- **Full-Face & Neck Coverage:** Its wraparound design delivers even exposure across the face, chin, and under-chin area, an area often missed by masks, for comprehensive treatment.
- **Three Targeted Light Modes:** 3 Medical-grade wavelengths deliver optimal results: red light therapy for collagen production and improved blood circulation, blue to target acne-causing bacteria, and near-infrared (NIR - 850 nanometers) penetrates deeper into the skin to reduce wrinkles and accelerate wound healing.
- **Flexible, Medical-Grade Silicone:** Its lightweight, skin-friendly silicone contours to every face shape, ensuring a secure fit and comfortable wear.
- **Removable Eye Cups:** Detachable silicone eye shields are designed for enhanced comfort, protection, and easy cleaning.

ARTEMIS blends RENPHO smart wellness solutions with new, advanced LED therapy to revolutionize skincare.

"People today are seeking professional-grade therapy they can access at home — without the barriers of cost, time, or complexity," said Toby Yu, CEO of RENPHO. "The launch of ARTEMIS

embodies our vision of wellness without boundaries while expanding our ecosystem to support our customers' body, mind, and now skin health.”

The RENPHO REJUVEN ARTEMIS LED Light Therapy Mask is available for \$199.99 on [RENPHO.com](https://renpho.com), with more retail channels to come. ARTEMIS comes with a USB charging cable, controller, eye cups, and adjustable head strap.

### **About RENPHO**

Established in 2016, RENPHO was founded with a single vision: to improve lives and empower people worldwide through smart and simple healthy living solutions. Since its inception, RENPHO has created a robust ecosystem of technologically advanced lifestyle products, providing affordable, accessible solutions for anyone looking to embark upon a health, fitness, or wellness journey. Known for its state-of-the-art smart scales and powerful massage products, RENPHO has become not only a powerhouse in the health and wellness tech industry but also a leading innovator that continuously puts out carefully researched, thoughtfully crafted products echoing the company's mantra: Empower Your Wellness.
