

Founded in 2024 and based in Orange County, Calif., SPARQ allows for cars and owners to finally speak the same language – using powerful AI to help drivers find out how to keep their cars in good health and solve problems before they happen. By fusing deep vehicle data with intuitive interfaces, SPARQ returns freedom and confidence to car owners – no subscription fees required.

Key Features

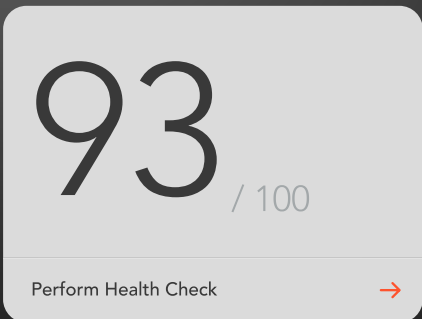

Multimodal AI Chat

Talk, text, snap or record: SPARQ’s AI understands your natural question format. Ask with voice, snap and upload a photo of that warning light, record engine-noise sounds or text a service estimate, and you get an immediate, plain-English diagnosis with actionable next steps.

Commercial-Grade Data Depth

Under the hood, SPARQ taps the same rich OBD-II data streams typically reserved for \$10,000+ professional scanners – without any monthly or annual fees – giving you real-time insight that rivals repair-shop equipment.

KUMAIL

I need to get my car repaired. Which dealers around me are good?

SPARQ AI

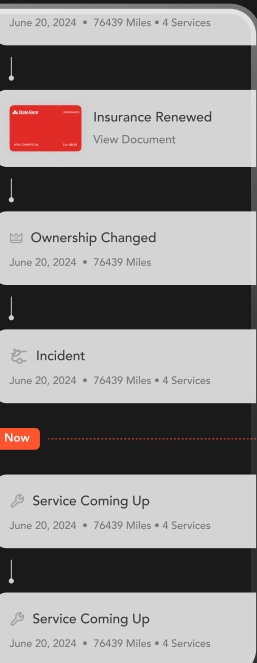

Based off your request and the local market, here are 3 shops

Personalized Service Recommendations

SPARQ AI scours repair and maintenance shop reviews and cost data in every user’s immediate area to suggest the highest-rated service centers near you. Just ask SPARQ, “Where should I go to fix this?” and receive personalized recommendations and fair-market cost estimates for the service.

Timelapse

View your car’s entire lifecycle at a glance: past repairs and costs, open recalls and a calendar of upcoming maintenance – complete with “due-by” dates and fair-market cost estimates, so you’ll never miss a critical service again.

Glovebox

Replace that paper chaos with a secure document vault. Upload insurance cards, registration, warranty paperwork and more, and SPARQ will automatically flag whether a recommended repair or recall is covered under your policies.

Privacy, Always

SPARQ never sells, shares or transfers user information – ensuring your diagnostic history and personal details remain only with you, where they belong.

SPARQ AI

Your Jaguar has a health score of 70, indicating a critical system is affected. During the

There are more than 260 million licensed drivers on the road in America.

Their cars are the oldest they’ve ever been (13 years, average), cost of ownership is the highest ever (more than \$1,000/ month, average) & car repairs cost more than ever before (up more than 30 percent over the past 4 years).

Drivers should be more concerned than ever before about “knowing their cars,” and their cars’ secrets shouldn’t be reserved for the dealerships, manufacturers and repair shops. SPARQ is the one true consumer solution in the marketplace.
