

PlanetBox® Voyager Leakproof Lunch Box

A durable, leakproof lunch box designed to keep meals sealed, separated, and mess-free

The **PlanetBox Voyager Leakproof Lunch Box** takes the stress out of packing messy foods. The secure silicone lid creates a leakproof seal, while four individually sealed compartments keep foods separated. Now you can pack the foods you usually skip; yogurt, dips, sauces, and leftovers stay contained and ready to eat. No mixing, no extra containers, and no leaks in backpacks so you can pack the “messy stuff” with confidence.

Made from silicone and recycled stainless steel with a brushed finish, Voyager is designed to last well beyond a single school year, helping reduce reliance on single-use containers by up to 180 annually. It has a compact, lunch-bag friendly size (7.5 x 7.5 x 2 in.), is easy to carry, holds up to 4 cups (940 mL) of food, and weighs just under one pound. Voyager is also compatible with the PlanetBox Rover Small Dipper and Rover Pods for added versatility. Simply align the lid with the compartments and press to seal. Not intended for hot liquids. Designed for school, camp, and busy weekdays, this lunch box can go straight into the dishwasher for easy cleanup. Voyager is a simple, long-lasting solution that keeps lunches sealed, separated, and stress-free. [Here](#) are five leakproof lunch ideas for inspiration. \$49.95, Planetbox.com
