

SUNBOOSTER PRODUCT SPECIFICATIONS AND FEATURES//

The average person spends 90% of their waking hours indoors – deprived of the benefits of natural sunlight. A new consumer device reintroduces the essence of sunlight into our indoor lives.

Meet SunBooster, the easy-to-use device powered by SunLED's patented technology. Compact and powerful, it delivers targeted near-infrared (NIR) light to boost your physical and mental well-being, energizing you wherever you choose to work.

Key Benefits:

- Brighten your day easily with SunBooster
- Improves physical well-being and boosts your mood with near-infrared light
- Feel brighter, lighter, and fully alive – and six times more energized
- Shield yourself against dark winters and say goodbye to afternoon slumps.

Engineered for Precision and Performance:

The SunBooster represents a breakthrough in consumer technology, featuring powerful NIR LEDs with precision narrow-beam optics. This compact design ensures users receive an optimal, scientifically calibrated dose of near-infrared light within just 2-4 hours (depending on the user's distance to the device).

Smart, Safe and Science-backed:

- Accurate light output at 850 nanometers – scientifically proven to deliver the best results
- Presence detection and built-in safety sensors.
- An intuitive display to inform and guide the user during their daily usage.

Patented Technology:

SunBooster is powered by patented SunLED® technology, achieving remarkable efficiency by delivering high-power light output while maintaining low continuous power consumption.

Technical Specifications:

- Power Consumption: 4.5 Watt (maximum)
- Dimensions: 83x62x56 mm (W*H*D, mount folded)
- Weight: 120 grams
- Package Contents: SunBooster and USB-C cable
