

NO BATTERIES REQUIRED POWERED BY MOTION

This innovative luggage scale generates its own power through kinetic energy. Push the button before use to activate it - no need to carry or replace batteries while traveling.

CHECK THE WEIGHT. SKIP THE STRESS.

Don't let overweight fees kill your vacation vibe. No batteries required means even less to worry about.

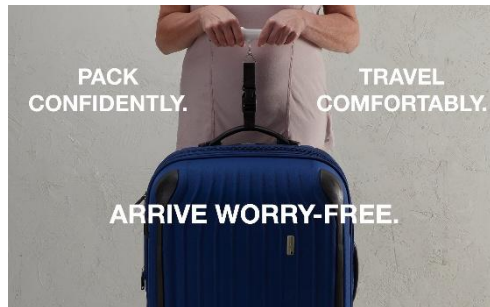

TAYLOR.

PACK
CONFIDENTLY.

TRAVEL
COMFORTABLY.

ARRIVE WORRY-FREE.

Make every trip stress-free by knowing your bag weight before you reach the airport. The [Taylor Kinetic Powered Digital Luggage Scale](#) takes the guesswork out of packing, giving you weight readings up to 110 lb so you can pack with confidence and avoid unexpected overweight baggage charges. What sets this scale apart is its innovative kinetic power technology. The motion-powered button design means there are no batteries to buy and no batteries to replace before departure. Simply push the button, attach the durable nylon strap and clip to your luggage handle, lift, and read your weight instantly on the clear digital display. It's lightweight and slim enough to tuck into a luggage tag pocket, carry on, or purse, yet robust enough to handle the weight of a fully packed suitcase. Whether you are preparing for a cruise, a business trip, or a family vacation, this compact luggage scale belongs in every traveler's toolkit. \$28.30, Amazon, TaylorUSA.com
