

KitchenAid® Borosilicate Glass Storage Containers With Lids Made from Tritan™ by Eastman

Seal, Save, and Enjoy! **KitchenAid® Storage Containers made from premium Borosilicate Glass and lids made from Tritan™ by Eastman** are designed for daily prep, leftovers, and pantry organization. They help keep your ingredients fresh and your kitchen beautifully organized. Seal in freshness, save what you love, and enjoy every bite. A sliding vented seal, along with a silicone gasket, forms a leak-proof, airtight seal. Secure locking latches snap the lid on tightly, providing confidence and preventing spills whether storing in the refrigerator or carrying with you. Also great to take your meal on the go—breakfast, lunch, and more.

These sleek, modular containers stack neatly in refrigerators, pantries, or on shelves to save space, reduce clutter and keep foods easy to find. Ideal size for pantry storage of everyday ingredients and making food prep a breeze. The containers are thermal shock resistant, leak-proof, odor- and stain-resistant, and food safe for long-lasting everyday use. The colored lids allow you to customize your collection and help you quickly identify contents. The coordinated palette blends nicely with KitchenAid countertop appliances to create a clean and stylish kitchen environment. Built for versatility and easy clean-up, the containers are freezer and dishwasher safe. Oven and microwave safe, without the lid (for reheating only).

The collection is available open stock and in sets beginning October 2026, in best-selling colors including Agave, Cardamom, and Porcelain White. Pricing ranges from \$12.99 to \$89.99, depending on material and configuration.
